

Environmental Statement

Whilst ensuring the economic growth of the Port, we will seek to understand and act with an awareness of the environmental implications of port activities, managing operations sensitively to act as a responsible conservator of Carlingford Lough and environment, of which areas have special designation.

Ensuring we operate in a manner consistent with the highest environmental standards, we will meet and strive to exceed all Environmental Regulatory Requirements, working in partnership with our Government and Commercial Partners.

The Environment is a key pillar of Sustainable development.

We will build a culture of Environmental awareness and implement a Sustainability Roadmap by targeting three main areas:

- Waste
- Energy Efficiency
- Pollution

Ensure staff training is aligned with business objectives and regular briefings include salient updates regarding our Environmental Licencing Obligations. Strive for continuous improvement through best practice.

Ensure the environmental policy is available and accessible to all relevant stakeholders and implement a clear procedure for reporting issues which may impact the Environment.

We will remain accountable to all our stakeholders and deal with Environmental issues in an appropriate, transparent and proportionate manner.
