

**Warrenpoint Harbour Authority**  
**Notice to Mariners**  
**No 3 of 2022**

**Storm's Dudley and Eunice**

Two deep low-pressure systems have been named by the Met Office and will bring very strong winds this week.

Storm Dudley will impact from Wednesday afternoon through to early Thursday, while Storm Eunice will bring strong winds and potentially some snow for parts of the country on Friday.

Storm Dudley - Strong winds will impact Northern Ireland on Wednesday afternoon, pushing eastward by evening. 80-90 mph wind gusts are possible on exposed coasts. The worst of the winds are expected to ease through Thursday morning. An amber weather warning is in place.

Storm Eunice - The next low-pressure system is likely to track across Northern Ireland on Friday. Further impacts are expected from disruptive gale force winds with 60–70 mph winds expected. This system is also expected to bring some heavy rain and there is a potential for some significant snow.

Disruption to normal pilotage service is anticipated and this will be actively monitored by Port Operations. Vessels laying alongside for the period of the weather warning must reassess their moorings and increase the number of mooring ropes if necessary.
